WHAT IS ARCHITECTURE?

Architecture is the art and science of designing buildings and structures

What does architecture mean to you?

_________________________________________________________________
_________________________________________________________________
Think about the different buildings that you saw today. What was your favorite, and why? Think about architectural features and the design choices made by the architect.
FEATURES AND MATERIALS

Look around you. Draw the building features that you see.

DOORS

WINDOWS

STAIRS

IN THE GALLERIES

Compare the different images of the Landry house. What information does each image tell you about the house?

BRING YOUR BUILDING TO LIFE!

Create a visual diagram of your building. You can draw a floor plan, an elevation drawing, or even write out a list of the building elements you used.
